SUMMARY

Full Stack, Game, and Mobile Developer who is curious about different new and emerging technologies. Builds fullstack web applications with Next.js, TanStack, shadcn/ui, Express, Supabase, and Neon, games with Godot, and mobile applications with Expo and Flutter. Experienced with Scrum and agentic workflows.

EDUCATION

Central Philippine University | 2023 - expected May 2027
Bachelor of Science in Software Engineering

PROJECTS

1. (Capstone) Trust Me Bro - Godot, SpacetimeDB | Sep 2026 - Present
   - Product Owner of the team: Managed backlogs and made final scope decisions.
   - Building a social deduction game for Junior High School students aiming to improve fact-checking skills
2. IBC Website - Next.js, Supabase, Playwright, Docker | Oct 2025 - Jul 2026
   - Built a CRM for the Iloilo Business Club; Contributed to the event and registration flows for the admin and the members of the business.
   - Scrum Master: Helped members with blockers, and helped manage user stories.
3. Coffee Point-of-Sale System - TanStack Start, Prisma, Better-Auth, Neon | May 2026
   - Contributed to the development of an internal point-of-sale system with inventory tracking for a franchise, with separate owner/admin and cashier roles.
4. PSSE Website - TanStack Start, Prisma, Neon, Cloudflare Workers | Jun 2026 - Present
   - Contributing to the website of the Philippine Society of Software Engineers, with public pages for events, projects, officers, merch, and an officer-side system to update content.
   - Scrum Master: Ran sprint planning, helped with blockers, and clarified requirements for teammates.
   - Built the event and registration flows, including barcode scanning for attendance.
5. LovedByLovef - TanStack Start, Supabase, Prisma | Feb 2026 - Present
   - Built a full-stack crochet request and order platform with separate user and admin roles.
6. Bellman-Ford Algorithm Game - Godot, Go | Mar 2025 - Jun 2025
   - Built an exploration game where the core logic runs the Bellman-Ford algorithm on a randomized weighted graph.

7. Home Greeting System - Python, TensorFlow, React, ESP32 | Apr 2026 - May 2026
    - Built a face recognition greeting kiosk with a partner; a TensorFlow and Keras model identifies who arrives and shows their name on a React kiosk screen.
    - Served the model through a FastAPI backend so an ESP32 can pull the live greeting state.

EXPERIENCE

AI Game On 2026, ICC, Iloilo
Technical Volunteer
Contributed to making a trailer game for the release of the Game On Portal.

HACKATHONS

Perfect Placement - TechGo 2024, Iloilo | Exhibited
Godot, Python. A sorting game controlled by camera-detected hand gestures

Baconawa and Eggs - Odyssey Festival 2024, Iloilo | 1st Runner Up
Godot. A multiplayer arcade game based on the Visayan myth of the Bakunawa

TrashTrek - GameOn 2025, Iloilo | Top 10
Godot, Python, MongoDB. An infinite-runner trash-sorting game. Added a Python backend for leaderboards.
